

We are high
throughput and
you could be too!

Ask us how.

💧 = liquid handler

⚡ = microplate reader, e.g. 384 well

Echo 💧

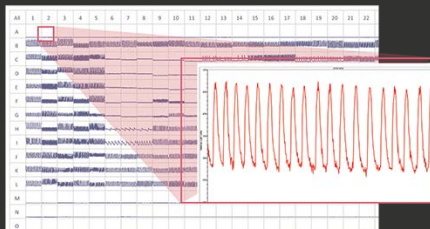

Transfers liquid using acoustic
energy, contact free, 2.5 nl to 2 ul.

NXp 💧

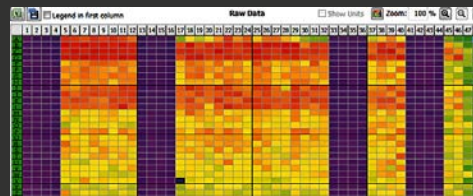

Inexpensive automation tips,
great for plate reformatting.

FLIPR ⚡

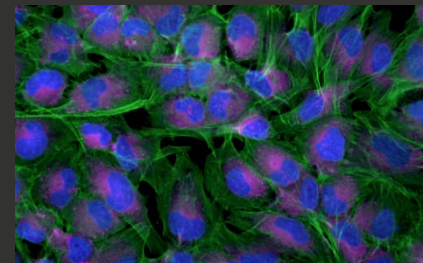

Real-time kinetic cellular assays
to study GPCRs and ion channels.

PHERASar ⚡

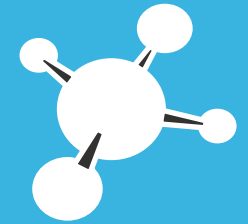

Latest generation of multi-mode
reader for widest dynamic range.

InCell ⚡

Automated system for fluorescent
and transmitted light imaging.
