

APC Laser Cutter Workshop: Slicing stuff up with light

March 27, 2019 at 3:00 p.m. in WL-216

This one-hour workshop is for those who would like to use the laser cutter housed in the Advanced Prototyping Center at Wright Lab. I will cover basic usage and capabilities, and why laser cutters should be added to your arsenal of fabrication techniques. If you already have experience with this machine, you are more than welcome to attend and share your knowledge!

RSVP requested at <https://tinyurl.com/apc-laser>.
