PROSPECT Neutrino Detector

Danielle Norcini† for the PROSPECT Collaboration (prospect.yale.edu)
Department of Physics, Wright Laboratory at Yale University, New Haven, CT 06511

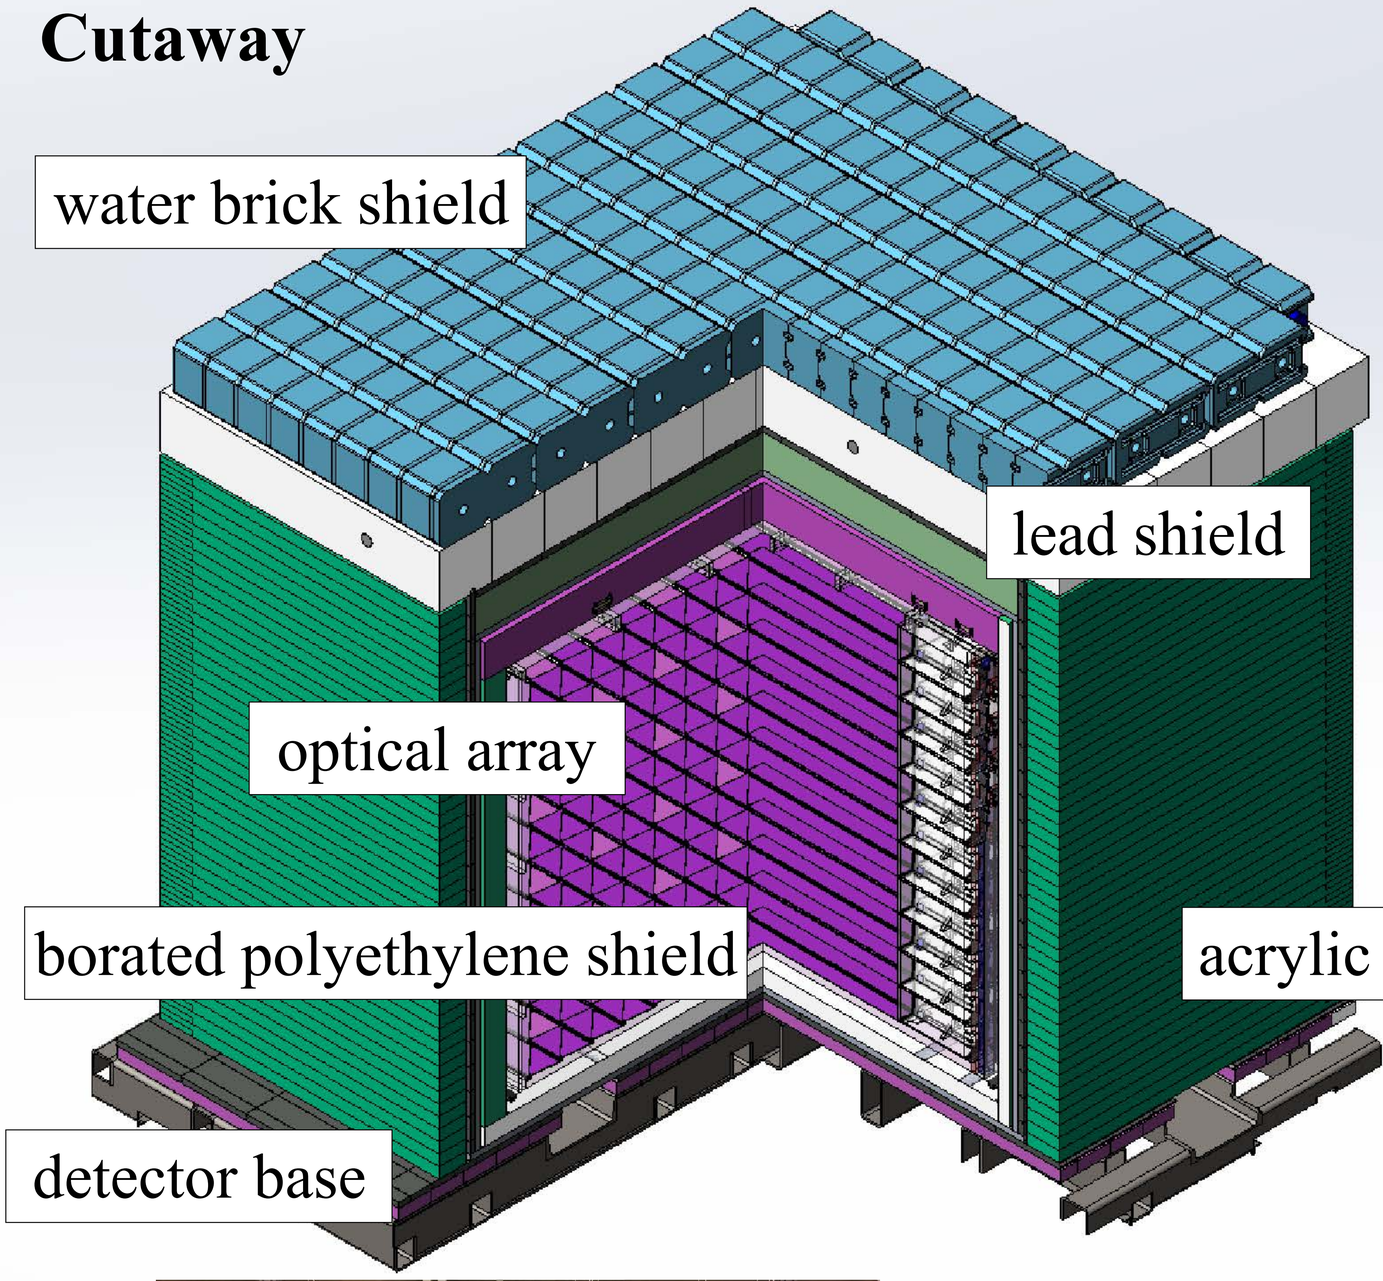
Wright Laboratory

LUX ET VERITAS

Detector Parameters

Active liquid scintillator mass: ~4 tons
Total weight: 38 tons
Dimensions: 114×104×116 in^3
Base Area: 102 ft^2
Movable via air casters

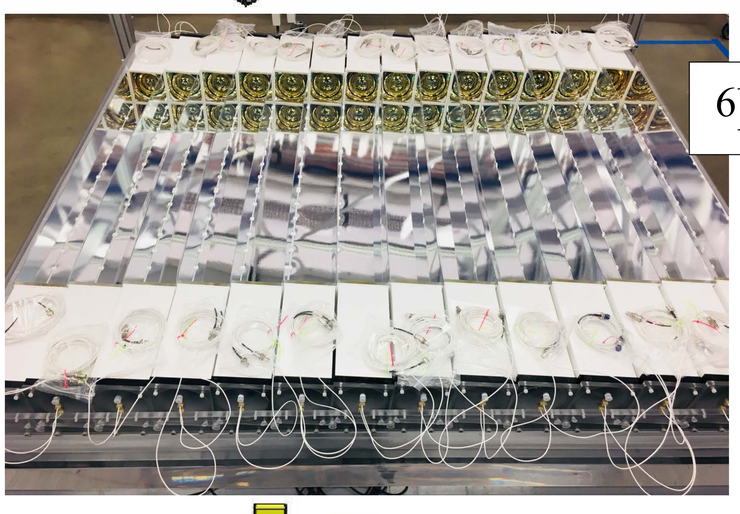
Cutaway



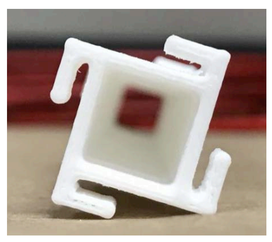
Construction at Yale Wright Laboratory

aluminum containment tank

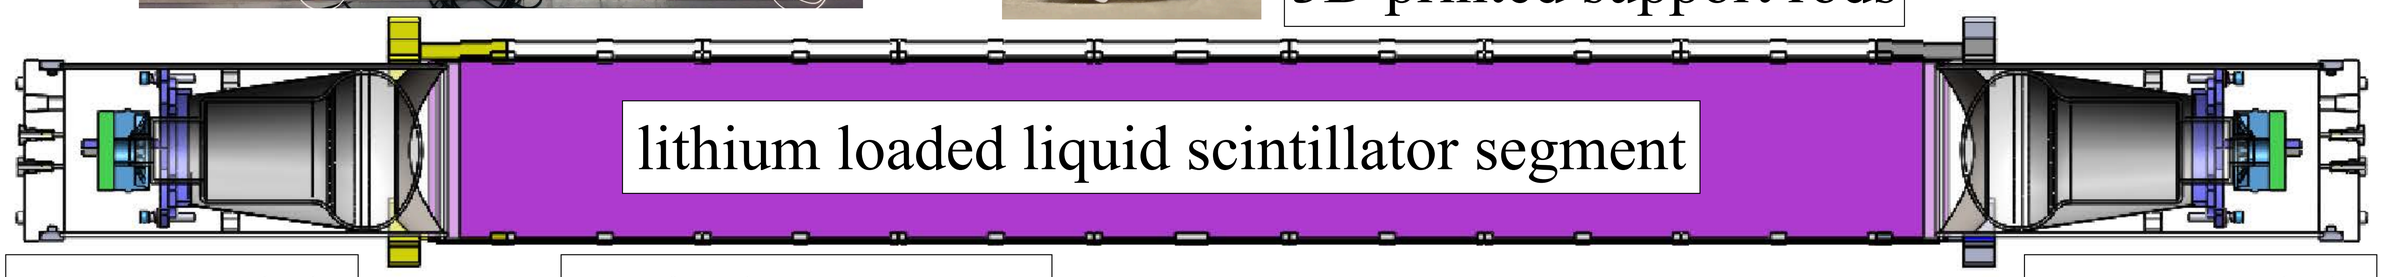
Exterior View at Reactor Site



^{6}Li-scintillator segments



3D printed support rods



Collaboration

Lawrence Livermore National Laboratory · Brookhaven National Laboratory · HFIR · Georgia Tech · Oak Ridge National Laboratory · NIST · Drexel University · W · UT · W&M · University of Waterloo · Le Moyne College · Temple University · Yale

Funding and Support

This material is based upon work supported by the U.S. Department of Energy Office of Science and the Heising-Simons Foundation. Addition support is provided by Illinois Institute of Technology, LLNL, NIST, ORNL, Temple University, and Yale University. We gratefully acknowledge the support and hospitality of the High Flux Isotope Reactor, managed by UT-Battelle for the U.S. Department of Energy.
